

North Slope, Alaska: Environmentally Sensitive Areas Map 2

PURPOSE

This series of maps provides a regional overview of the environmentally sensitive resources of the North Slope of Alaska from Point Barrow to the Canadian border. The maps show the distribution of sensitive resources and the locations of human-use features. The maps are intended to provide information to the public and to the management agencies responsible for the protection of these resources. The maps are not intended to provide a detailed description of the resources or to provide a basis for management decisions. The maps are intended to provide a general overview of the resources and to provide a basis for further study and research.
